DETAILED ACTION

It should be noted that claim 42 recites a transport system and is dependent on claim 37. For the purpose of this Office Action, the Examiner presumes that claim 42 is a conveying system. However, clarification of the scope of the claim is required in response to this Office Action.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-36, drawn to method for the machining and a machining installation, classified in class 144, subclass 360.
- II. Claims 37-42, drawn to a conveying system, classified in class 144, subclass 215.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product in this instant, the product does not have to index the wood workpiece before machining.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

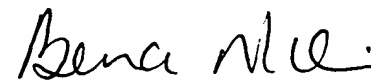

A telephone call was made to Mr. John Holman on 10/03/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bena Miller whose telephone number is 571.272.4427. The examiner can normally be reached on Monday-Friday.
